# Storage machine with roller box

## Technical data

Lr	Lu	Layers	Capacity
1750	1450	36	96 m <sup>2</sup>
2040	1750	36	116 m <sup>2</sup>
2300	2000	36	133 m <sup>2</sup>

The gambarelli impianti technical office is at the customer's disposal to develop customised projects.

## Description of the machine

The machine is foreseen for the in-line loading and the front unloading of the roller box in single row.

The machine is composed by:

- fixed roller way with steel structure
- mobile roller way with steel structure, with a loading capacity through box
- mobile arm complete with spindles for the roller box loading
- motorizations with frequency variators
- safety system following the existing rules.

The machine, in its various versions, treats sizes from 10x10 up to 60x60; the standard size treats sizes ranging between 15x15 up to 40x40.

It is driven by an electric equipment with programmable logic. Size changeovers and alarms visualization are handled by the alphanumeric keyboard externally to the control panel.
